

## FROSTY LEAVES

Hand blown and hand cut  
crystal-clear leaf.

Traditional glass blowing is timeless. The number of things you can create from a lively substance such as glass does not cease to fascinate us. It is beautiful when in a mass, which highlights its unparalleled optics. For this reason, we designed leaves that make use of the clear crystal substance and immaculate work with the shape. As a cluster, they offer a truly emotive experience, which is why we will always be loyal to crystal.
